

Bug reports for register page (App)

#1)

Title: App accept registration with verify First name , last name and password fields spaces

Steps:

- 1) Open ToolShop App
- 2) Open register page
- 3) Enter spaces at First name, last name and password fields
- 4) Click register

Description:

When verify First name, last name and password fields spaces accept value and sign up successfully.

The screenshot shows the 'Register' page of the ToolShop App. At the top, there's a status bar with signal strength, Wi-Fi, and battery icons. Below it, the app's header shows 'Register' with a back arrow. The form contains four input fields: two for text (First name and Last name) and two for email and password. The email field is filled with 'djdj@gmail.com'. Below the form, a green banner displays the message: 'You are registered, click here to sign in.'

Expected Result: Reject values and Registration field.

Actual Result: Accept values and registered successfully.

Bug reports for login page (App)

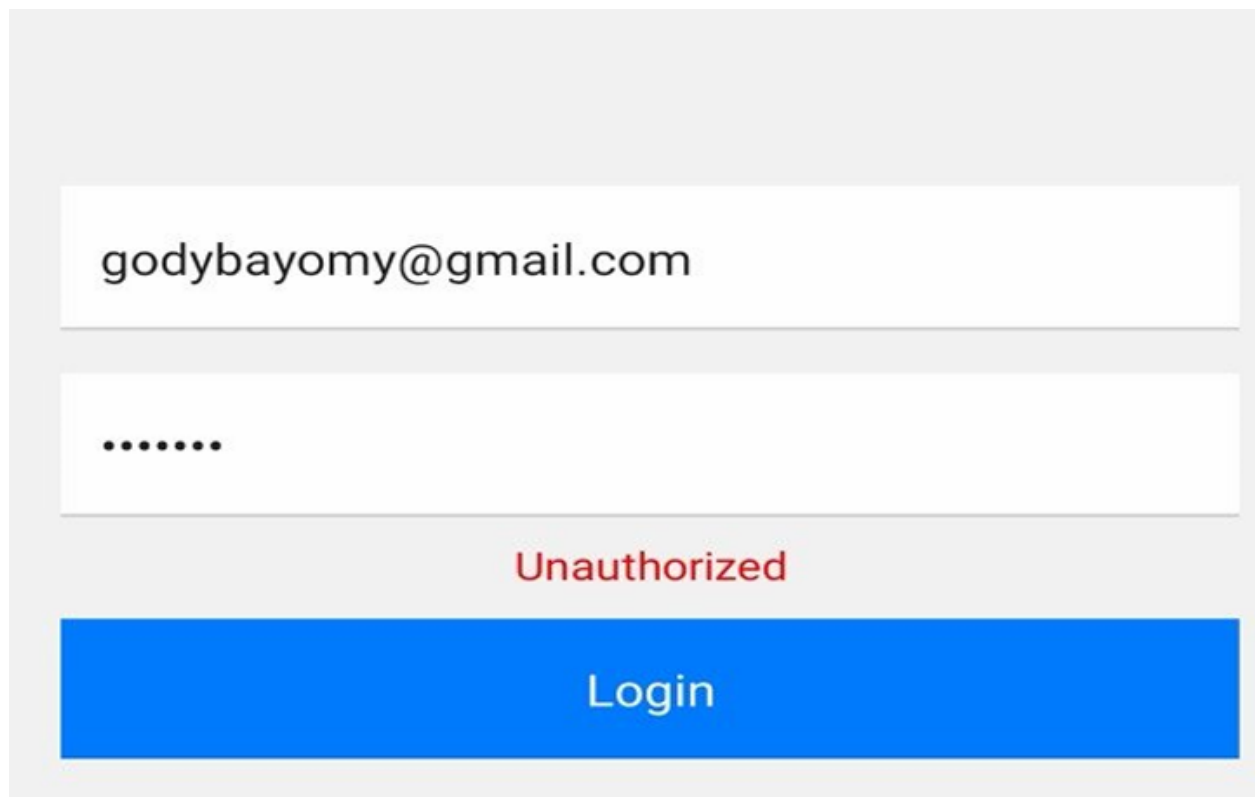

#1)

Title: Login fails with valid credentials

Steps:

- 1) Open ToolShop App
- 2) Open login page
- 3) Enter Email and password with login enabled

Description: When I entered valid account, the login fails

The screenshot shows a login interface with two input fields. The first field contains the email address 'godybayomy@gmail.com'. The second field contains seven dots, representing a masked password. Below the password field, the word 'Unauthorized' is displayed in red text. At the bottom of the form is a large blue button with the word 'Login' in white text.

Expected Result: successful login.

Actual Result: login fails.

Bug reports for check out (App)

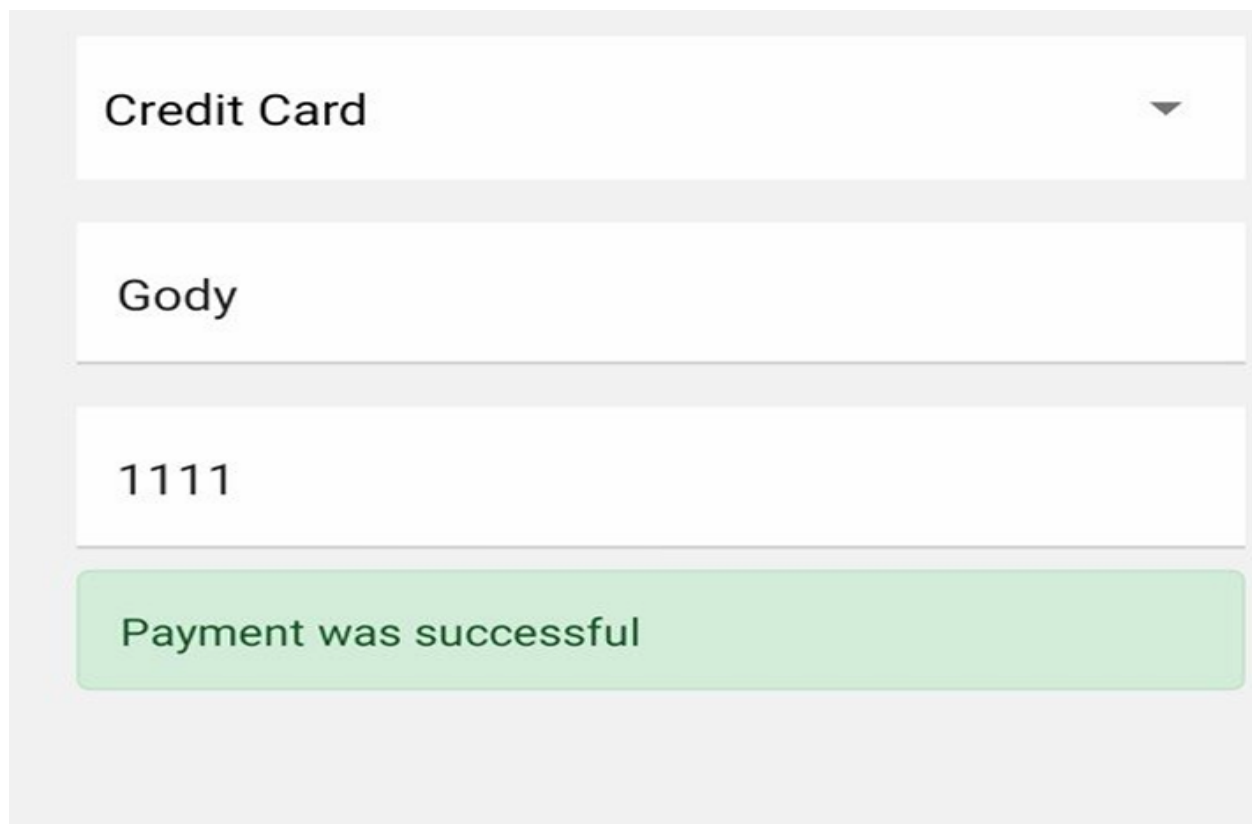

#1)

Title: Payment accepts invalid credit card number.

Steps:

- 1) Open ToolShop App
- 2) Open checkout payment
- 3) Enter “1111” in credit card number

Description: When I entered “1111” the system accepts an invalid credit card number and proceeds without displaying any error message.

The screenshot shows a checkout interface with three input fields and a confirmation message. The first field is labeled 'Credit Card' and has a dropdown arrow. The second field is labeled 'Gody'. The third field contains the text '1111'. Below these fields is a green button with the text 'Payment was successful'.

Credit Card
Gody
1111
Payment was successful

Expected Result: Field show error.

Actual Result: The field accepted wrong value without showing error.

#3)

Title: Payment is successful with empty Account name field

Steps:

- 1) Open URL <https://practicesoftwaretesting.com/>
- 2) Open checkout payment
- 3) Leave Account name empty

Description: When I leave Account name empty the system accepts card number and proceeds without displaying any error message.

The screenshot displays a payment interface with a light gray background. At the top, there is a white dropdown menu labeled "Credit Card" with a downward arrow on the right. Below this is a white input field for "Account Name", which is currently empty. Underneath the account name field is a white input field for a card number, containing the text "1111-1111-1141-1111". At the bottom of the form is a green rectangular button with rounded corners that says "Payment was successful" in white text.

Expected Result: Field show error.

Actual Result: The field accepted wrong value without showing error.
