

Bug Report for register page (First Name)

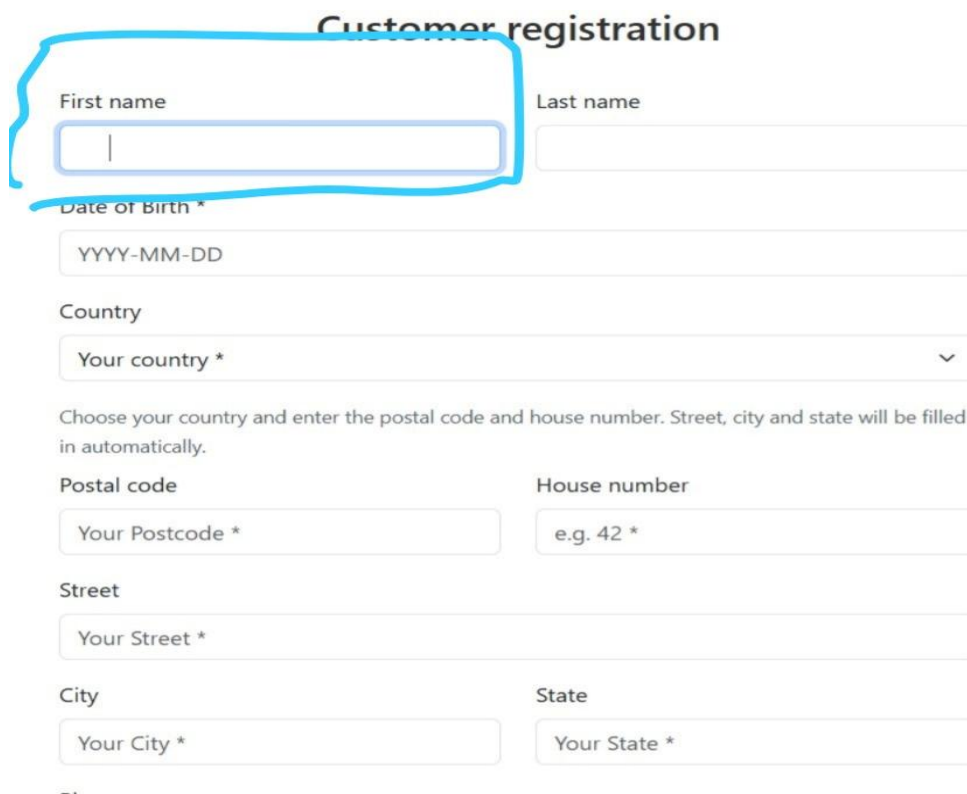

#1)

Title: First Name field accepts invalid input (Spaces) without showing error.

Steps:

- 1) Open URL <https://practicesoftwaretesting.com/>.
- 2) Open register page.
- 3) Enter " " (5 spaces) at First Name field.

Description: When I entered 5 spaces in the First Name field, the system did not reject the input or show a validation error.

The screenshot shows a 'Customer registration' form. The 'First name' input field is highlighted with a blue hand-drawn box. The form includes the following fields: 'First name', 'Last name', 'Date of Birth *' (with a placeholder 'YYYY-MM-DD'), 'Country' (a dropdown menu with 'Your country *'), a note 'Choose your country and enter the postal code and house number. Street, city and state will be filled in automatically.', 'Postal code' (with 'Your Postcode *'), 'House number' (with 'e.g. 42 *'), 'Street' (with 'Your Street *'), 'City' (with 'Your City *'), and 'State' (with 'Your State *').

Expected Result: Reject the value and show error.

Actual Result: The field accepted the spaces without showing error (Fail).
